TIMING & CONTROLS.

Delete control types STS (Special Test Start) & STF (Special Test Finish) – no Special Tests have been applied for.

Control & timing procedures are elaborated upon as follows:

R.9.2.1. Any control is considered to extend for 50m around the actual point at which Officials are making their records, or **3m in the case of NAM "See Diagram" controls.**

R.12.3. The time of arrival at or departure from a control **including** intermediate and final controls of Regularity Sections, will be the time at which the Time Card is presented by the Competitor concerned, providing all crew members and cars are within the control area.

R.30.2.2. Where a control at the end of a section timed to the second (or to the second and part thereof) also forms the start of a section timed to the minute, the time of departure will be considered as being the same as arrival, but ignoring any seconds or parts thereof.
